Use as a tracing guide or to aid
in composition and layout.

HD Digital Projection

The LED 1000 represents the latest technology in LED digital art projection. Featuring full HD resolution and 1000 lumens of illumination, the LED 1000 offers the discriminating artist and designer the ultimate in precision image projection. Connectable to virtually any digital source, including the latest smart phones and tablets, the LED 1000 will project images or videos onto any surface to assist the artist and designer in viewing, scaling, composing, and laying out imagery. Images are projected with true-to-life color, with a full suite of controls to adjust the color and image position.

AC Adapter: UL / CSA
