New ArtSeries Light Boxes from Artograph

DATE: June 19, 2006

Artograph Introduces a New Series of Stainless Steel Light Boxes

Artograph's new high quality light boxes are crafted towards the needs of the discriminating artist, crafter and designer. Constructed of stainless steel, these light boxes offer a comfortably slanted surface for more convenient viewing and tracing. The translucent surface is flush-mounted for a clean and completely unobstructed flat work surface. Accurate 90 degree edges offer precise reference for measuring and attaching T-squares. The brilliant illumination is created by the combination of daylight fluorescent lamps and a specially designed polyester pearlescent reflector system. The result is a bright viewing window that is free of hot spots or shadows. Ideal for embossing, stenciling, scrapbooking, creating custom cards, calligraphy, embroidery appliqué, needlework, quilting, stained glass, cartooning, and more. The Artograph ArtSeries light box is available in 3 different sizes.

Suggested Retail: 3 models ranging from \$84.95 - \$219.95
Call for availability.

Artograph is the manufacturer of a full-line of opaque art projectors, light boxes and spray booths. For more information on the new ArtSeries Light Boxes or other Artograph products, please contact:
