New Professional ProSeries Light Boxes from Artograph

DATE: January 10, 2005

Artograph Introduces a Whole New Level of Professional Light Boxes

The **NEW ProSeries Light Boxes** from Artograph are uniquely designed and crafted towards the needs of the discriminating and creative mind. Constructed of durable stainless steel and extruded aluminum; the ProSeries offers features that the artist, crafter, designer or photographer will truly appreciate and expect in a top quality light box. These light boxes offer a comfortably slanted surface for more convenient viewing and tracing. The translucent surface is flush-mounted for a clean and completely unobstructed flat work surface. Accurate 90 degree edges offer precise reference for measuring and attaching T-squares. The near-perfect illumination is created by the combination of 5000K fluorescent lamps and a specially designed polyester pearlescent reflector system. The result is a brilliant viewing window that is free of hot spots or shadows. Unlike any other light box, these new light boxes feature a unique hidden front storage compartment. Pencils, pens, embossing stylus, rulers and many other tools can be stored for easy access. A handy finger recess and cord strap combine to make these Artograph light boxes portable and highly practical. The Artograph ProSeries Light Boxes are available in 8 different sizes and lamp configurations. Made in the USA.

Suggested Retail: 8 models ranging from \$119.95 to \$579.95
Call for availability.

Artograph is the manufacturer of a full-line of opaque art projectors, light boxes and spray booths. For more information on the new ProSeries Light Boxes or other Artograph products, please contact:
